Urdu
Native or Bilingual Proficiency

INTERESTS

- Machine Learning
- AI Development
- Mobile Application Development
- MERN Stack

EDUCATION

Bs Information Technology
International Islamic University Islamabad
09/2018 - Present   CGPA 3.33

PERSONAL PROJECTS

E-Farming Store (07/2021 - Present)
- E-farming Store is my final year project. It is based on agriculture products and tools for formers. Former can easily get the fertilizers and medicines on discount as in market rate. The Former can also get agricultural vehicles for rent. The former can also buy the vehicles on an installment-based system. This project is undergoing.
- https://github.com/MuhammadIshaqSkd/E-Farming-Store

Hotel Booking System (02/2020 - 06/2020)
- This was my first project on python Django. This project is based on a Hotel Booking system the user or customer can visit the site choose the hotel he that he in any city he can also check the details about the hotel such as the rooms prices location and the facilities of the hotel. He can book a room and pay the payments online.
- https://github.com/MuhammadIshaqSkd/Hotel-Booking-System

Online Medicine Store System (02/2021 - 03/2021)
- This project in Django. In this project customer can order his medicine through our online store. Customer firstly register him self after that he can buy the medicine that he want. He can also check his total orders and deliver and pending orders. He can notify about his order status.

IIUI Services Mobile App (09/2021 - 10/2021)
- This is my class project which is designed for students. This app contains different features for university students i.e FYP portal, GPA Calculator, Hostel portal, and Contacts of IIUI.
- The app has validated the student's email during his/her registration. After the verification of the email, the student will be able to log in the system.
- https://github.com/MuhammadIshaqSkd/IIUI-Services-App

School Management System App (03/2019 - 05/2019)
- This application is implemented on python Tkinter. In this project, the admin can manage the student and the teacher's records. The admin can add new students and teachers to the system, and also he can perform many other operations such as update records, delete, search and check error reports.
- The Student can log in to the system and can check his records such as results fees etc. The teacher can also log in and can enter the student results.
